

PATENT CLAIMS

1. A laminated sheet for the display of information, said sheet comprising a lower base layer which consists of a print layer (4, 8, 9) having a protective layer (1, 2) laminated on its upper side, c h a r a c t e r i z e d in that a net layer (5) of polyester is laminated below the print layer (4, 8, 9).
2. A laminated sheet according to claim 1, c h a r a c t e r i z e d in that the print layer (4) is formed by a rubber material.
3. A laminated sheet according to claim 1, c h a r a c t e r i z e d in that the print layer (8, 9) is a laminate which consists of PVC (8) and a plastics/adhesive layer (9).
4. A laminated sheet according to claims 1 – 3, c h a r a c t e r i z e d in that a glue (6) and a film (7) are laminated below the polyester layer.
5. A laminated sheet according to claim 4, c h a r a c t e r i z e d in that a plastics/adhesive layer (10) and a PVC layer (11) are laminated between the polyester layer (5) and the glue (6).
6. A laminated sheet according to claims 1 – 5, c h a r a c t e r i z e d in that the protective layer is formed by a laminate which consists of a polyurethane layer (2) and a frictional layer (1).
7. A laminated sheet according to claim 6, c h a r a c t e r i z e d in that the frictional layer (1) consists of glass beads and broken glass.
8. A laminated sheet according to claims 1 – 7, c h a r a c t e r i z e d in that the sheet has a thickness of between 0.3 and 2.5 mm or of between 3 and 12 mm.
